PETER ABIOLA AFOLABI

Full-Stack Software Engineer | Web & Mobile | React · Next.js · Node.js · Laravel

afolabipeter49@gmail.com · +234 816 927 1036 · Lagos, Nigeria · linkedin.com/in/peteraafolabi · github.com/McPherson49

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience designing, building and shipping production web and mobile applications for fintech, agritech, HR, logistics and education businesses in Nigeria and the UK. I own products end to end, from database design and REST APIs to responsive React/Next.js interfaces and Android releases on Google Play, and I have built multiple live platforms as the sole or lead engineer. Experienced with escrow and payment flows, financial API integrations and role-based systems. I write clean, secure, maintainable code and work well in fast-paced start-up and remote teams.

KEY HIGHLIGHTS

- **Shipped a live agro-commerce marketplace on web and Android** (GreenMarket NG): 1,000+ downloads and a 4.3/5 rating on Google Play.
- **Built 5+ production platforms end to end** as sole or lead engineer, covering marketplaces, investment, HR, home services and school management.
- **Integrated payment, escrow, utility and financial APIs** into live fintech and e-commerce products.
- **Full-stack range:** React, Next.js, Vue.js, TypeScript, Node.js/Nest.js, Laravel/PHP, MySQL and MongoDB.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, PHP, SQL, HTML5, CSS3
Front-End	React.js, Next.js, Vue.js, Tailwind CSS, responsive & accessible UI, state management
Back-End	Node.js, Nest.js, Laravel, RESTful API design, authentication & role-based authorisation
Mobile	Android app development, Google Play release & updates
Databases	MySQL, MongoDB; schema design, query optimisation, data integrity
Payments & APIs	Payment gateways, escrow workflows, utility & financial APIs, third-party REST services
Delivery	Git, GitHub, Bitbucket, CI/CD, deployment & hosting, code review, Agile/Scrum, performance optimisation

PROFESSIONAL EXPERIENCE

Front-End Developer — TechMill Resources · **Lagos (Hybrid)** — Oct 2025 – Present

- Build component-driven, responsive interfaces for internal and client-facing platforms using React, Next.js, TypeScript and Tailwind CSS.
- Integrate RESTful APIs and manage application state to deliver reliable, data-driven features to production.
- Collaborate with product and engineering teammates in Agile sprints to scope, ship and iterate on features quickly.

Full-Stack Developer — T40 Limited · **Remote** — Jan 2025 – May 2025

- Owned features across the stack: designed and built APIs and back-end services, and the user workflows that consume them.
- Delivered end-to-end features combining responsive UIs with dependable server-side logic.

Web & App Developer — Reaphsoft Systems Ltd · **Remote** — Mar 2024 – Dec 2024

- Built full-stack web and application features with React on the front end and PHP/MySQL on the back end.
- Shipped responsive, cross-browser products and back-end integrations for clients in the UK and Nigeria.

Full-Stack Developer — CDLP Hub · **Remote** — Dec 2023 – Mar 2024

- Built responsive front ends together with back-end APIs and data handling for web platforms.

Software Developer — Savertech Limited (Fintech) · **Ibadan** — 2022 – Jan 2024

- Started in back-end engineering and moved across the stack, gaining end-to-end ownership of fintech features.
- Integrated payment, utility and financial APIs into production fintech products; built UIs in JavaScript, React and Vue.js.
- Maintained and improved live features in an Agile team using Git-based workflows.

SELECTED PROJECTS

GreenMarket NG — Agro-Commerce Marketplace (Web + Android) 2025

Full-stack, front end & back end · Live on Google Play: 1,000+ downloads, 4.3/5

- Built the platform end to end: a marketplace where Nigerian farmers and vendors sell agro-products and buyers order produce for delivery.
- Developed the web front end, back-end APIs and database, and the Android app published on Google Play.
- Implemented an escrow payment flow that protects buyers and sellers, plus a referral system, user accounts and seller listings.
- Shipped ongoing releases with UI improvements, bug fixes and updated terms and escrow guidance.

Gigitright — Freelance Talent Marketplace 2026

Full-stack

- Two-sided marketplace connecting clients with verified freelancers: gig browsing, freelancer profiles and skill-based applications.
- Integrated back-end services for job posting, hiring and secure payment workflows.

VestQ — Digital Investment Platform 2026

Full-stack

- Responsive interfaces and back-end integrations that let users invest in financial products and track portfolio growth.

StruxHR — HR Management Platform 2026

Two-person team, shared full-stack ownership

- Built responsive interfaces, core workforce-operations features and API integrations.

Dorchester Home Services — dorchestercsltd.co.uk 2024

Sole developer · React, PHP, MySQL

- Built the full UK platform matching home-service help workers with clients, from React front end to PHP/MySQL back end and data model.

Child Ville — School Management System — childvillecentre.com 2024

Sole developer · PHP, MySQL

- Built the complete system, including schema design, an admin portal with role-based access for staff, and core administrative workflows.

Intercity — Logistics & Travel Platform 2024

Next.js, Laravel

- Built core parcel-delivery and interstate trip-booking features across the Next.js front end and Laravel back end.

EDUCATION & TRAINING

BSc Economics — Ekiti State University, Ado-Ekiti 2017 – 2022

Frontend Engineering Program — AltSchool Africa 2022 – 2023

Software Engineering Bootcamp (JavaScript, React, PHP) — Sheda House Web Academy 2021 – 2022

National Diploma, Cooperative Economics & Management — Federal Cooperative College 2012 – 2015
